Inactivated Poliovirus			IPV	IPV		IPV						IPV
Influenza ⁵						Influenza (Yearly)						
Measles, Mumps, Rubella ⁷							MMR		see footnote 7			MMR
Varicella ⁸							Varicella		see footnote 8			Varicella
Hepatitis A ⁹							HepA (2 doses)				HepA Series	
Meningococcal ¹⁰											MCV	

 Range of recommended ages

 Certain high-risk groups

This schedule indicates the recommended ages for routine administration of currently licensed vaccines, as of December 1, 2008, for children aged 0 through 6 years. Any dose not administered at the recommended age should be administered at a subsequent visit, when indicated and feasible. Licensed combination vaccines may be used whenever any component of the combination is indicated and other components are not contraindicated and if approved by the Food and Drug Administration for that dose of the series. Providers should consult the relevant Advisory Committee on Immunization Practices statement for detailed recommendations, including high-risk conditions: <http://www.cdc.gov/vaccines/pubs/acip-list.htm>. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS). Guidance about how to obtain and complete a VAERS form is available at <http://www.vaers.hhs.gov> or by telephone, 800-822-7967.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR DISEASE CONTROL AND PREVENTION

The Recommended Immunization Schedules for Persons Aged 0–18 Years are approved by:
Advisory Committee on Immunization Practices (<http://www.cdc.gov/vaccines/recs/acip>)
American Academy of Pediatrics (<http://www.aap.org>)
American Academy of Family Physicians (<http://www.aafp.org>)

More information regarding vaccine administration can be obtained from the websites above or the CDC-INFO contact center:
